

EVote - Blockchain Reset Steps

Fresh Sepolia Smart Contract Deployment - Completed Steps

- Opened the original **blockchain-voting-system** project in VS Code.
- Opened the **blockchain** folder.
- Deleted the old compiled blockchain folders: `blockchain/artifacts` and `blockchain/cache`.
- Opened the VS Code terminal and moved into the blockchain folder using `cd blockchain`.
- Recompiled the Solidity smart contracts using `npx hardhat compile`. Compilation completed successfully with 16 Solidity files.
- Checked the Sepolia wallet and network using `npx hardhat run scripts/checkWallet.js --network sepolia`.
- Confirmed the Sepolia network, Chain ID **11155111**, deployment wallet connection, and sufficient Sepolia ETH.
- Deployed completely fresh smart contracts using `npx hardhat run scripts/deploy.js --network sepolia`.
- New EVoteForwarder contract: `0x8eA46aEAaD2602297378AF3E0cC0FcecB1fdB7fE`.
- New Voting contract: `0x4a098846F38c867B3Ece752d494BaBc3F5F518a2`.
- Fresh SuperAdmin wallet: `0xDA53e5780957aA8F63C2715f591828C957a83c49`.
- Updated `blockchain/.env` with the new Voting and Forwarder contract addresses.
- Updated `backend/.env` with the new contract address values.
- Updated `frontend/src/contract/contract.js` with the new Voting and Forwarder contract addresses.
- Rechecked the Sepolia wallet connection with the wallet-check script.
- Verified the new deployment using `npx hardhat run scripts/verifySepoliaDeployment.js --network sepolia`.
- Verification confirmed the Voting contract, Forwarder contract, SuperAdmin address, and **Trusted Forwarder = true**.
- Started the frontend using `cd frontend` followed by `npm run dev`.
- Confirmed that the frontend loaded successfully.
- Connected MetaMask on the Sepolia network using the fresh SuperAdmin wallet.
- Completed registration and successfully entered the application.

Current Fresh Deployment

Network: Sepolia

Chain ID: 11155111

Voting Contract:

`0x4a098846F38c867B3Ece752d494BaBc3F5F518a2`

Forwarder Contract:

0x8eA46aEaAD2602297378AF3E0cC0FcecB1fdB7fE

SuperAdmin Wallet:

0xDA53e5780957aA8F63C2715f591828C957a83c49

Note: The previous contracts still permanently exist on the Sepolia blockchain, but the EVote project is now configured to use the newly deployed contracts.
